# SYMPLECTIC
ELEMENTS

A powerful system that enables research institutions to collect, contextualize, and report on their research outputs

AGGREGATE FROM MULTIPLE DATA SOURCES

Elements draws on an expanding list of online sources to populate profile content automatically.

CUSTOMIZED REPORTING

Analyze Elements data across departments, groups, or the whole institution: understand your research strengths and plan for growth.

INTEGRATE WITH INSTITUTIONAL SYSTEMS

Seamlessly integrate with existing institutional systems such as HR, registrar and grants databases.

RESEARCH INFORMATION MANAGEMENT MADE SIMPLE

Manage a comprehensive range of research-related activities in one system.

INCREASE RESEARCH VISIBILITY

Easily update web profiles, institutional repositories, and discovery networks, such as VIVO, with the data found in Elements.
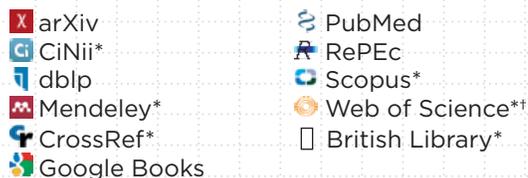

DIGITAL science

REDUCE THE ADMINISTRATIVE BURDEN ON FACULTY MEMBERS

Elements searches databases from well-known content providers to discover automatically information about your faculty members' research outputs, including books, articles, conference proceedings, and patents.
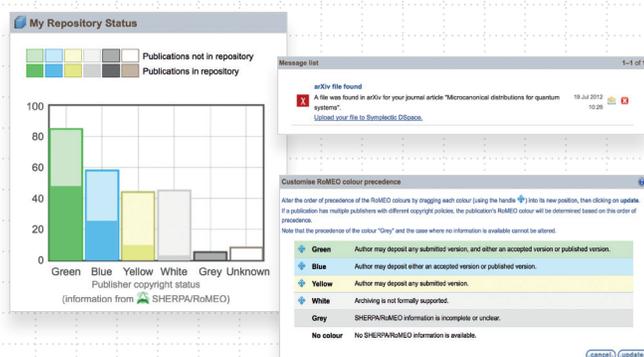

Multi-disciplinary coverage includes:

- arXiv
- CiNii*
- dblp
- Mendeley*
- CrossRef*
- Google Books
- PubMed
- RePEc
- Scopus*
- Web of Science*†
- British Library*

*subject to data subscriptions
†Lite and Premium web services

ADVANCED TECHNOLOGY TO HELP FILL YOUR INSTITUTIONAL REPOSITORY

Support your repository team by streamlining the deposit workflow; gain access to additional reports and supporting information, such as RoMEO statuses, that make self-deposits or mediated-deposits quicker and simpler.
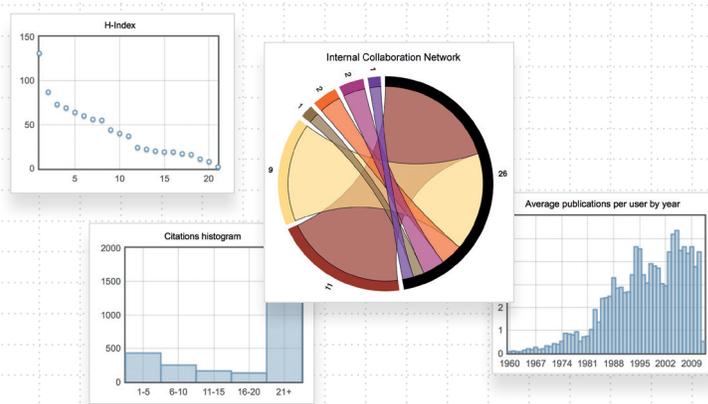

DATA FOR ANALYSIS AND ASSESSMENT

Elements gives your research managers, strategy team, and institutional leaders the tools they need to assess your institution's research strengths and plan for growth.

The report builder presents the latest data in a range of formats, customizable to show any set of users or to compare departments or groups.

Data can be exported at any time for further analysis or extracted using our powerful API for use in your institution's own management systems.

SUPPORT AND EXPERTISE

Symplectic provides expert training and a wide range of user and technical guides for faculty and system administrators.

Our active user community is at the core of our development; Symplectic offers plenty of opportunities to get involved, including:

- Support website with community user forums
- Repository tools user group
- Academic steering panel
- Annual User Conference
